INSTALLATION GUIDE

Android APK via EAS

How to Install the ShiftEase (Azania) Android App.

- Follow these steps to install the ShiftEase app on your Android phone.

Step 1: Get the Download Link

- You will receive a download link from your manager. It will look like something like: https://expo.dev/accounts/your-account/projects/your-project/builds/…
- Tap the link on your Android device or type it into your phone's web browser (Like chrome).

Step 2: Download the APK file.

- The link will open a page on the Expo website with information about the build.
- Find and tap the button download the APK file (e.g., app-1.1.0.apk).
- Your browser may show a warning: "This type of file may harm your device."
  This is a standard Android security message. Tap OK to proceed with the download.

Step 3: Allow Installation from Unknown Sources.

- After the download is compete, open the notification shade, and tap on the download APK file.
- If this is your first time installing an app outside the Play store, you will see a screen that says, "For security, your phone is now allowed to install unknown apps from this source."
- Tap Setting and then toggle on "Allow from this source."

Step 4: Install the App

- Go back to the installation screen. You should now see an "**Install**" button.
- Tap "**Install**." The process will only take a few minutes.
- Once complete, tap "**Open**" to launch the app, or find the Azania (ShiftEase) icon in your app drawer.

Troubleshooting Installation.

- "I cannot find the downloaded file."
  Open your files or downloads app and look for the apk file name.
- The installation button is greyed out.
  Ensure you have successfully enabled "**Install Unknown Apps**."
- The app will not open after installation.
  Ensure your device meets the minimum requirements (Android 8.0+).
  Try restarting your phone and then opening the app again.
